Please do not stop XM Satellite Radio from broadcasting traffic and weather. I live in a rural area of Kentucky and listen to XM exclusively because the only radio station that comes in clearly plays country. When preparing for a trip we utilize XM's traffic and weather. If I am willing to pay for it, please let them broadcast it. Change is hard but we all have to do it from time to time. The Clear Channel monopoly is what you should be going after. Sincerely,
Katherine Taylor
